In last week *Space Pioneer* had its debut on Android platform via Google Play and Samsung Galaxy Apps. Similarly to iOS premiere the tittle was visible in the important ranks and received very good notes from players. Till today the best grossing countries are those most crucial like USA, China and Japan.

In next few months lots of novelty will be added into game e.g. new game modes, armor, weapon and robot personalization, opponents with new gameplay mechanisms and buildings helpful during space base develloping. The firs update will be send to the stores in 3 weeks.

Million downloads during the premiere weeks is a good result. Players are very active and engaged which is visible in high notes in stores. We're not entirely satisfied with the in-apps monetization yet, but the game has solid basis which are crucial to systematic metric growth – comments Remi Kościelny, CEO of Vivid Games.
